List of project themes for *Cryptography and Security*
Academic year 2026/2027

Lecturer: Prof. Dr. Marek R. Ogiela

Own proposals please consult directly with prof. M Ogiela
via email (mogiela@agh.edu.pl) till 30.10.2026

Projects can be realized in the form of short descriptive article, or PPT presentation (approx. 20 slides per person) or program implementation.
Deadline for project evaluation is the middle of January 2027

1. Quantum cryptosystems
2. Block ciphers (description, comparison, efficiency)
3. Digital signature algorithms
4. Digital watermarking
5. Biometrics in cryptography
6. Wi-Fi security
7. On-way hash functions
8. Key generation and distribution protocols
9. Image steganography
10. Homomorphic ciphers
11. Hacking and cryptanalysis approaches
12. Elliptic-curve cryptosystems
13. Subliminal channel
14. Secret sharing and splitting
15. Blockchain and distributed ledger technologies
16. SSH, SSL, TLS protocols
17. DNA cryptography
18. Fuzzy Vault systems
19. Visual cryptography
20. Electronic currencies
21. Two-factor authentication
22. AI-assisted cryptoanalysis
